SAKB was founded in 2019 by a farmer family who wants to share the great taste of their coffee with the world.

Currently coffee is one of the leading commodities from Indonesia. Many companies that produce and sell coffee have sprung up but this has not had a good impact. Farmers have no control over the final quality and price of coffee.

SAKB collaborates with many farmers so they can jointly control the quality of coffee and provide a fair price for the farmers and also the buyers.
