اتحاد الغرف السعودية  
Federation of Saudi Chambersالموضوع : عرض تقديمي بشأن مقترن  
استثماري قرغيزستان

بسم الله الرحمن الرحيم

(برقية)

رؤية ٢٠٣٠  
المملكة العربية السعودية  
KINGDOM OF SAUDI ARABIA

سلامه الله

سعادة أمين عام الغرفة التجارية

السلام عليكم ورحمة الله وبركاته،

إشارة إلى برقية وزارة الخارجية رقم (٢٢٢٥٢٧-٤٥٠١-١٤٤٥) وتاريخ (١٦/١١/٢٠٢٤) والمشارف فيها إلى مذكرة سفارة جمهورية  
قرغيزستان لدى المملكة والمرفق طيبها عرض تقديمي بشأن المقترن الاستثماري "تطوير المعادن النادرة على أساس مخلفات  
منجم Kutessay-II Ak-Tuz بجمهورية قيرغيزستان".

عليه نأمل من سعادتكم الاطلاع واتخاذ اللازم بشأن التعليم على المهتمين من منتسبي غرفتكم الموقرة.

وتفضوا بقبول أطيب تحياتي وإحترامي ،

الأمين العام

وليد بن حمد العريان

## برقية صادرة

رقم البرقية: ..... رقم الملف: ..... التاريخ: ..... المرفقات: .....

سلامه الله

سعادة وكيل وزارة الاستثمار للعلاقات الدولية

سعادة نائب المحافظ ورئيس الادارة العامة للاستثمارات الدولية

سلامه الله

في صندوق الاستثمارات العامة

سلامه الله

سعادة الأمين العام لاتحاد الغرف السعودية

السلام عليكم ورحمة الله وبركاته

أفيد سعادتكم بتلقي الوزارة مذكرة من سفارة جمهورية قرغيزستان لدى المملكة ومشفوعها - المرفق نسخته- عرض تقديمي بشأن المقترن الاستثماري "لتطوير المعادن النادرة على أساس مخلفات Kutessay-II Ak-Tuz بجمهورية قرغيزستان".

لتفضل سعادتكم بالاطلاع واتخاذ ما ترون مناسباً. وتقبلوا أطيب تحياتي وتقديرني.

وكيلاً الوزارة لشؤون الاقتصاد والتنمية بالإشراف

سلمه محمد العاصري  
سعود بن محمد الساطي

Kyrgyz Geological Survey

**Investment proposal for the development of rare earth metals on the basis of the Ak-Tyuz tailing dumps and the Kutessai-II deposit**

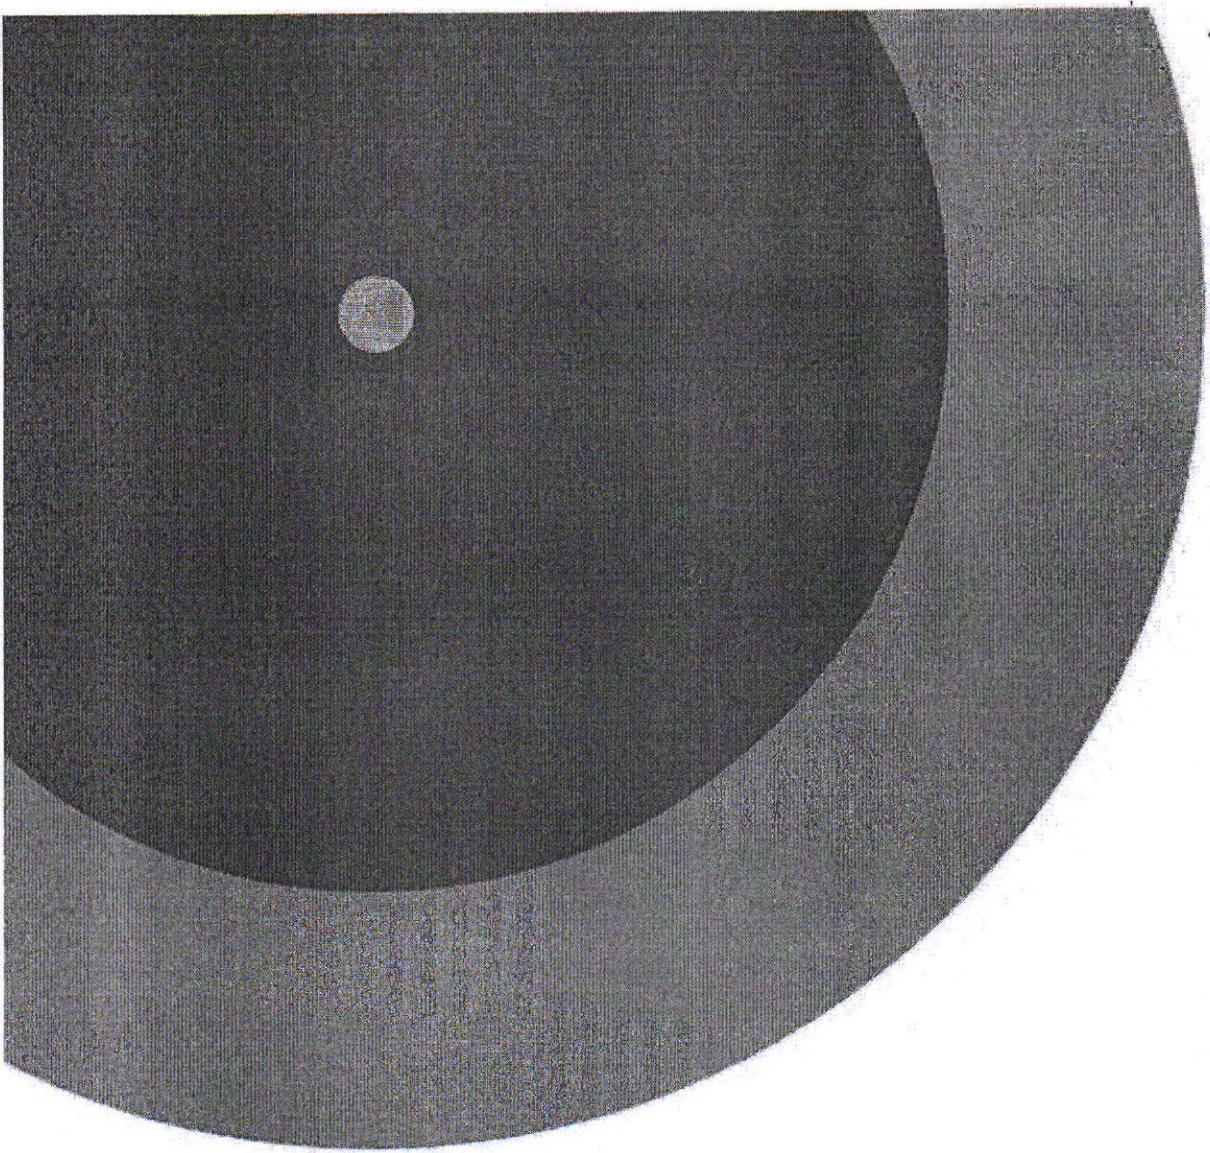

In the Kyrgyz Republic

# Rare earth me

Rare earth metals (REM) are a group of 16 elements.

REM is widely used in various technological industries, such as the production of high-power magnets, catalysts, lasers, nuclear power, fiber optics, electronics and other high-tech sectors.

Due to their strategic importance for various industries, the extraction and processing of rare earth metals is a significant industrial activity.

## Reserves of the Kutessai II deposit

Kutessai II is located on the territory of the Keminsky district of the Chui region. It is orographically located on the slope of the Tasa-Keminsky ridge, which is the watershed of the Maly and Bolshoy Kemin rivers. Geographical coordinates of the deposit: 760,070,270 sq.s. and 420,510,320 sq. d.

## Data on tailings dumps

As a result of the production activities of JSC KHMZ (1942-1995), 5 tailings dumps were formed. Four tailings dumps are located in the area of Ak-Tyuz settlement, the fifth The Boordun tailing dump is located 3.8 km south of the city of Orlovka.

### Kutessai II deposit

The weighted average particle size is 0.138 mm, the average density is 1.60 g/cm<sup>3</sup>

Audit work for economic  
is carried out at 4 tailings

Buurdinskoye tailing  
volume is 3.2 million  
million tons

Tailing dump No. 1Tr  
370.6 thousand. m<sup>3</sup> :  
thousand tons

Tailing dump No. 2vc  
thousand. m<sup>3</sup> = 800  
tons

Tailing dump No. 3Tr  
1050 thousand. m<sup>3</sup> =  
thousand tons

Total volumes for  
tailings dumps No.  
1, 2, 3 – 3.1 million  
tons

Volumes of the  
Buurdinsky tailings  
dump 5.1 million tons

# Technical and economic calculation

Nº	Name	Amount in US\$ (Per year)
1	Mining and technical costs.	6,500,000
2	Mining and processing costs. Operational and depreciation expenses.	17,500,000
3	Chemical and metallurgical plant.Operational and depreciation expenses.	13,666,000
	Total:	37,666,000
	Profit before tax.	418,000,000
	Net profit.	380,334,000
	Production capacity.	1 million tons

# Economic indicators

## Mining costs:

Nº	In an open way	Underground way	Total of US\$ (Over 18 years)	Annual
1	48,000,000	65,000,000	48,000,000 + 65,000,000 = 113,000,000	113/18 years =
		Total:	113,000,000	6,5

## Mining and processing costs:

Nº	Capital expenditures	Operating costs (over 18 years)	Total of US\$ (Over 18 years)	Annual
1	45,000,000	270,000,000	45,000,000 + 270,000,000 = 315,000,000	270/18 years
	Total:	315,000,000		17,5

## Chemical and Metallurgical plant:

Nº	Kapitalnye zapravki	Operating costs (over 18 years)	Total of US\$ (Over 18 years)	Annual
1	30,000,000	216,000,000	30,000,000 + 216,000,000 = 246,000,000	246/18 years
	Total:	246,000,000		13,6

All:

674,000,000

37,6

## Total costs

### Mining and processing costs:

### Mining and processing costs:

### Chemical and Metallurgical costs:

48 million

45 million - Capital expenditures

30 million - Capital €

65 million

15 million - Operating costs

12 million - Operational costs

Equal to: 113 million –mining.

15 million x 18 years = 270 million \$

12 million x 18 years

113/18 years = \$ 6.5 million/year

270 million \$ + 45 million\$ = 315 million \$/over18 years

\$ 216 million + \$ 30 million/over18 years

315 /18 years = \$17,500 million/year

246 /18 years = \$ 13

## Cost price

### Recycling

Processing – 1,000,000 million tons  $\times$  2,545.97 g/t  $\Sigma TR203$  - 2,545.97 tons of iron in ore/year of extraction  
1,900 tons/year of metal

Concentrate yield – 5% total: 50,000 tons of concentrate per year

The content in the concentrate is  $\Sigma TR203$  - 38 189.55 g/ton = 3.8% of the concentrate

For the extraction of 1 million tons of ore = \$ 6.7 million

Depreciation funds (annual) – \$4.1 million/year

Operating costs – \$ 27 million/year

Total: 1 ton of concentrate = \$ 757.32 (cost) = 34,370.5 grams = \$ 22.03 per kilogram of metal

# Ongoing work at the Buurdinsky tailings dump

## Geological tasks

- Carrying out search and evaluation work on the entire area of work.
- Carrying out a complex of exploration works for polymetals, in order to calculate reserves and allocate an area for industrial development.
- Conducting technological studies of tailings and determining the possibility of obtaining commercial concentrates from them using modern equipment and the latest enrichment methods.

Nº	Types of work	Unit of measurement
1	Core drilling of wells	
2	Topographic and geophysical work on the surface	ha
3	Spectral analysis	probe
4	Assay for gold and silver	probe
5	Chemical analysis for Pb, Zn, Au, Ag, Cu, In, TR, etc.	probe
6	Laboratory technological research	probe
7	Hydrogeochemical studies	probe
8	Preparation of the report	squad/day

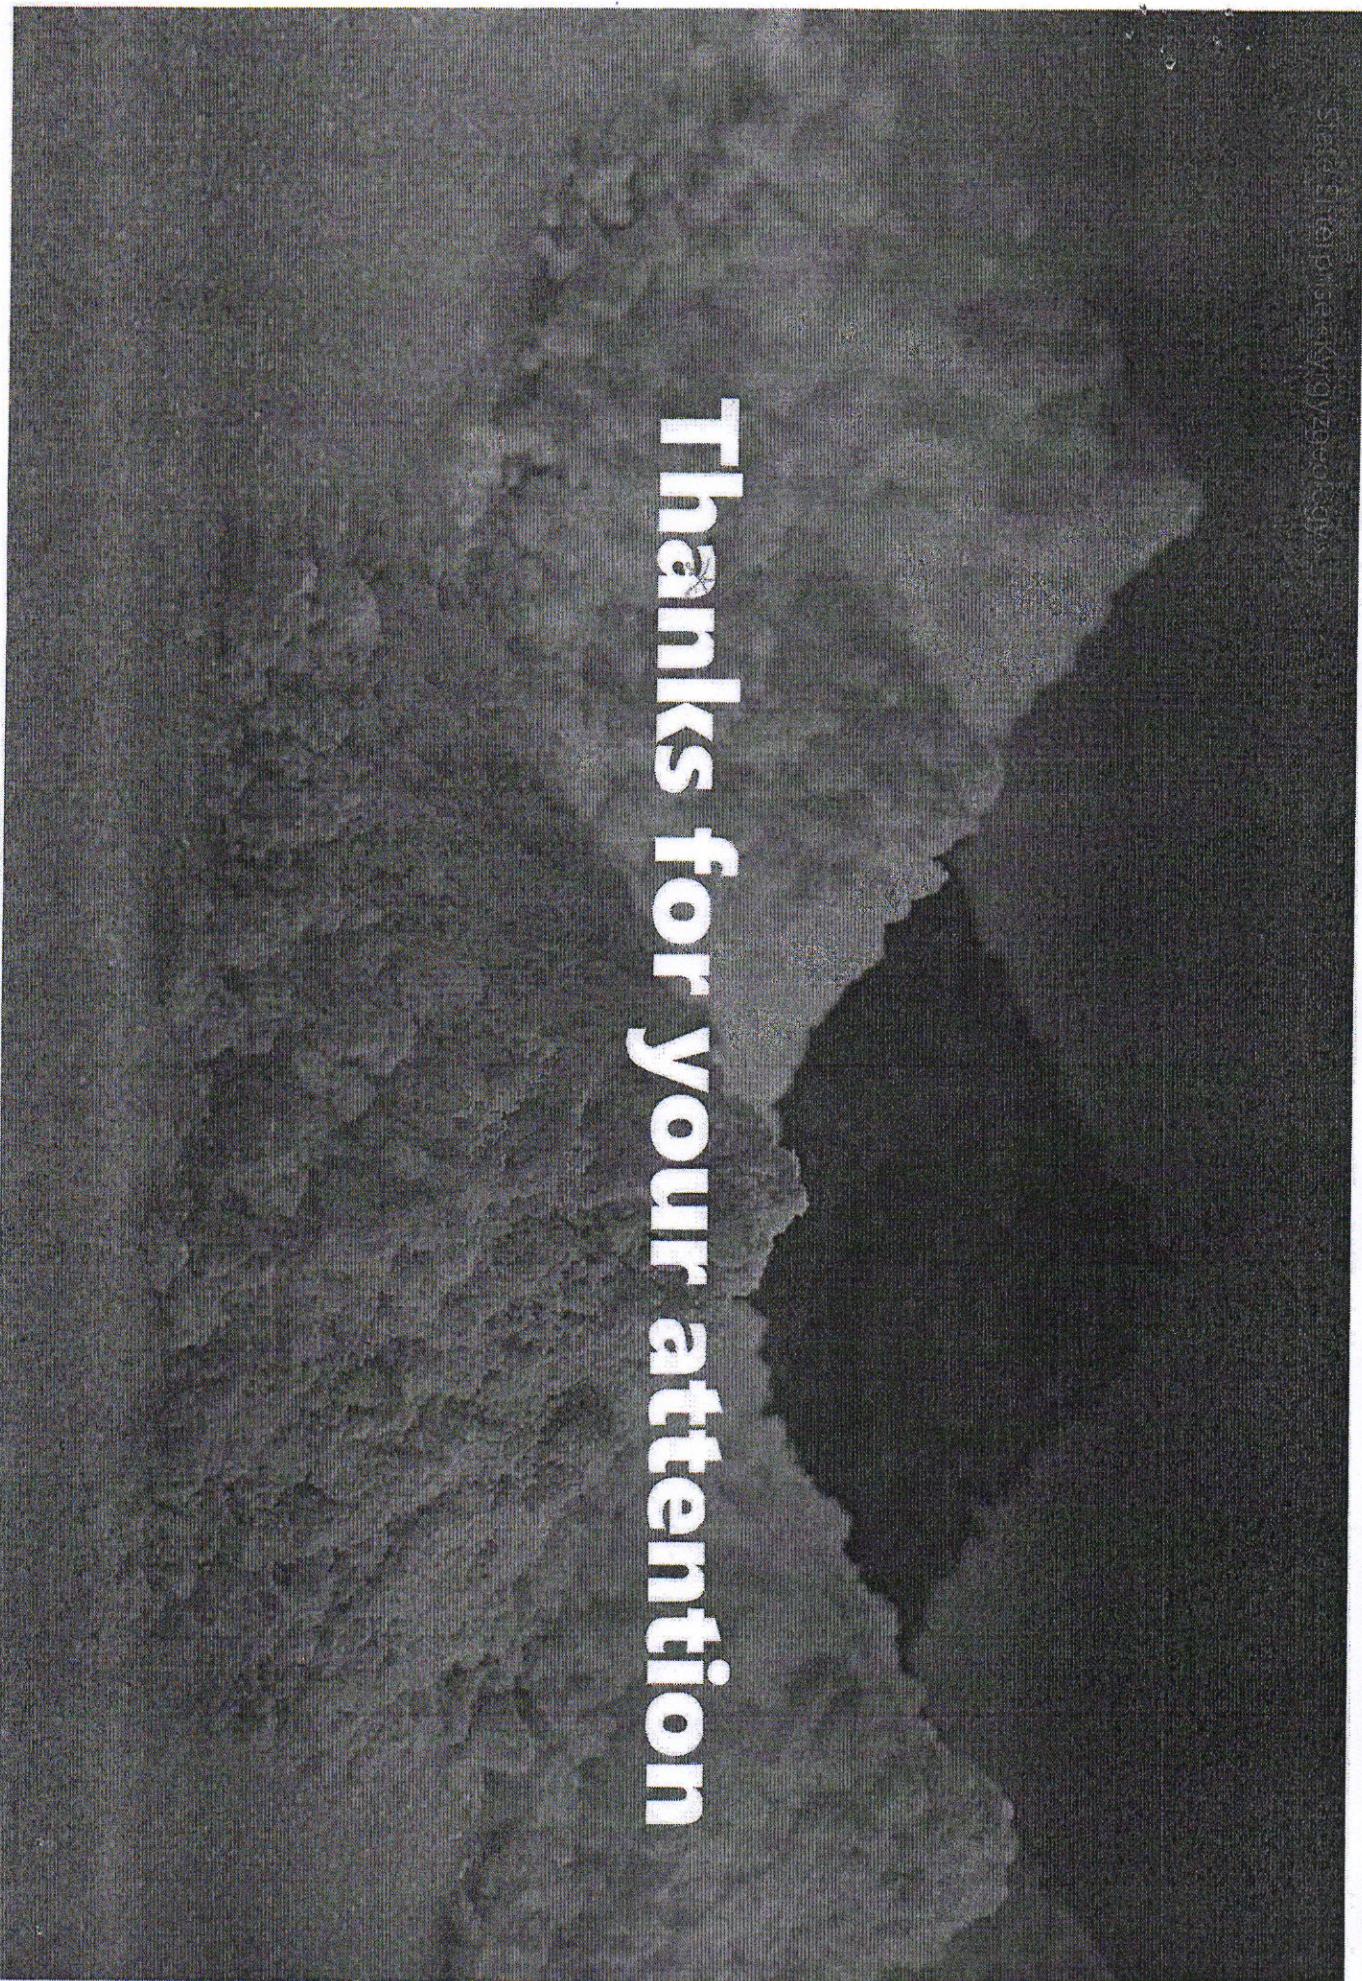

The tasks are solved by the following types of work:

- Generalization and analysis of geological materials;
- Conducting search and filming operations;
  - Core drilling and sampling;
  - Geophysical and technological research;
  - Topo-surveying service of mining operations
  - Construction and restoration of access road
  - Analytical research and reporting.

## Reserves of the Kutessai II deposit

As of 01.01.1992, in the author's figures in the following amount (Protocol No. 445 of October 31, 1995.)

Counting elements	Balance sheets			Off-balance sh Inventory categ		
	B	C <sub>1</sub>	C <sub>2</sub>	B	C <sub>1</sub>	6
1	2	3	4	5	6	
<b>Total for the field without balance sheet</b>						
Ore reserves, thousand tons	15147,4	1797,5	3464,7	-	-	-
The amount of $T\bar{R}_2O_3$ , t	40950,5	3892,8	7250,3	-	-	-
